

Greenlandic AFIS Aerodromes (BG**)

NOTE: All Greenlandic AFIS aerodromes require a **Tier 2** endorsement.

General Reminders

- The transition altitude in Greenland **varies between aerodromes**.
- For Greenlandic aerodromes, clearance shall first be obtained from Iceland Radio (BICC_1_FSS.) If Iceland Radio is not online, then:
 - For aerodromes underlying the **North** sector:
 - Aircraft should be instructed to depart at their own discretion.
 - For aerodromes underlying the **West** sector:
 - Request clearance from the lowest BIRD West sector online (usually BIRD_W1_CTR), or the lowest South sector if no West sectors are online.
 - For aerodromes underlying the **Gander** OCA (in southern Greenland):
 - Request clearance from Gander Radio (CZQO_FSS), or NAT sandbox (NAT_FSS) if CZQO is offline.
