

Icelandic AFIS

Aerodromes (BI**)

As of 20th March 2024, all departing aircraft from a aifs airfield will receive a standard clearance but you are still required to receive the clearance from BIRD.

UPDATE: Effective **1 March 2024**, all Icelandic AFIS aerodromes require a **Tier 2** endorsement.

All existing S2 controllers, as well as any students currently in S2 training who have already been trained on AFIS, will automatically receive this endorsement. New S2 students must request training for this endorsement separately, after they have received their S2 rating.

General Reminders

- The transition altitude for Iceland is **7000ft**.
- IFR and oceanic clearance shall be obtained from the **lowest BIRD South sector** (usually BIRD_S1_CTR.)
- **Only some aerodromes have ATZs**. For all others, the AFIS unit is responsible for aircraft "in the vicinity of" the aerodrome (i.e., within, joining, or leaving the traffic circuit.)
